

Zohra Jayaraman

Senior Product Designer | Design Systems | AI & Healthcare

5+ yrs experience and a background in research and psychology. 4+ yrs experience designing for healthcare clients. Skilled in managing and evolving design systems.

RECENT EXPERIENCE

Product Designer II **3/2022 - Present**

UST Global/Moonraft Innovation Labs: A design agency

- Modernize multiple complex health plan tools (data-dense workflows, quoting, enrollment, book of business) for hundreds of thousands of internal and external users
- Own and evolve a Figma design system (450+ components, tokens, documentation) to support 100+ designs for a national health insurer, enhancing both internal efficiency and product consistency
- Translate large design files or complex requirements into clear, pixel-perfect, functional prototypes using Figma Make with existing design systems, saving weeks of time
- Lead cross-functional problem-solving, ideation, and prioritization workshops and design reviews to drive product alignment and innovation
- Led interface audits across all files, mapping every component's usage context and design decisions to enhance components and create flexible, context-aware guidelines, saving customization time in development
- Educate design system users on best practices through documentation (usage guidelines, dos/don'ts, examples, component searchability), accelerating adoption

UX/UI Designer, UX Researcher **4/2021 - 3/2022**

TrueToForm: A startup; AR/VR body scanning app

- Conducted user testing with 50+ participants and uncovered critical insights; presented findings to communicate importance of key issues and brainstorm solutions
- Designed solutions that increased primary user task success rate by 70% and decreased task time by 40%
- Revamped UI design including templates and pitch presentations to build a cohesive brand

Classroom Teacher **8/2019 - 6/2020**

Oakland Charter High School
